

COURSE: | ART 196
INSTRUCTOR: | KIRK MILLER
PROJECT: | Mobirise Website
DUE DATE: |

DESCRIPTION: | Design a personal website using the free drag-and-drop offline website builder Mobirise.

OBJECTIVES: | Learn and experience the concepts of website design using an offline drag-and-drop website builder where the understanding of HTML and CSS is unnecessary.

DIRECTIONS: |

1. Design a personal website containing at least 4-5 pages or a single page with 4-5 sections.
2. This project should be designed as your personal website. If this topic isn't suitable to you, redesign an existing website or design a website for a fictitious company, band, soccer team, etc.
3. Collect photos, drawings, and other content that will serve as a foundation for your website.
4. The format for this website should be 1200 x 800 pixels.
5. Your design may be predominantly text with some images.
6. Incorporate a slideshow with at least 6 slides.
7. Use my personal website at gallery-934.com as a template for what I expect from this assignment.
8. Create a free 000webhost.com account and use their cPanel to publish your website. Make sure you upload your index.html and assets folder into your public folder.
9. Aesthetics and overall design are certainly important, but more important, your website must be functional (i.e., it must work).

**REMEMBER TO SAVE YOUR PROJECT FREQUENTLY!
Your grade will be based on concept, overall design,
and technique.**

MATERIALS: | Computer, Internet Connection, Mobirise, Photoshop, Free 000webhost.com account
