

COURSE: ART 196  
INSTRUCTOR: KIRK MILLER  
PROJECT: Slide Show  
DUE DATE:

---

**DESCRIPTION:** Create a nonlinear slide show using Flash

- OBJECTIVES:**
1. Apply basic and intermediate features / tools and techniques of Flash to create a non-linear movie.
  2. Develop a movie with multiple scenes.
  3. Use basic ActionScript to create a preloader.

- DIRECTIONS:**
1. Design a slide show containing atleast 4-5 images.
  2. This project should be themed (i.e., portfolio of your work, slides from your vacation, pictures of your dog, etc.).
  3. The slide show should fit within a 550 x 400 format. It may be smaller if you wish.
  4. You may also use a button/s designed in the last assignment.
  5. For inspiration do some research. Look at some of the examples at [www.flashkit.com](http://www.flashkit.com). Just surfing the web and noting interesting flash movies from other web sites can be inspirational.
  6. Last, this project must include a preloader.

SAVE YOUR PROJECT FREQUENTLY WHILE YOU ARE WORKING

**MATERIALS:** Flash

**PRESENTATION:** Email .swf file to instructor.
