

COURSE: ART 196  
INSTRUCTOR: KIRK MILLER  
PROJECT: Web Site  
DUE DATE:

---

**DESCRIPTION:** Design a web site using Dreamweaver.

**OBJECTIVES:** Apply basic and intermediate features / tools and techniques of Dreamweaver to create a web site.

- DIRECTIONS:**
1. Design a web site containing at least 4-5 pages.
  2. This project should be designed as your personal web site. If this topic isn't suitable to you, re-design an existing web site or design a web site for a fictitious company, band, etc.
  3. The format for this web site should be 800 x 600.
  4. Your design may be predominantly text with some images added.
  4. You may also use a button/s designed this semester in Flash as well as the slide show, but you are not required to use Flash in this project.
  5. Use my web site at [www.kmart66.com](http://www.kmart66.com) as an example of what I expect in this assignment.
  6. Aesthetics and overall design are certainly important, but more important, your web site must be functional (i.e., it works).

SAVE YOUR PROJECT FREQUENTLY WHILE YOU ARE WORKING

**MATERIALS:** Dreamweaver, Flash, Photoshop

**PRESENTATION:** Email the URL to instructor
